

## Personal Information

My name is Bikesh Khyaju, and my family and friends calls me Bk. My father and mother's names are Balaram Khyaju and Chandra Maya Ganshi Khyaju. I was born in Bhaktapur, Bagmati. Currently, I am studying for a B.I.T. at CITE (Collage of Information Technology and Engineering). My hobbies include traveling, playing football, and enjoy playing computer games.

## About My Organization

The organization a worked at was Amsoft Technologies as an intern. my internship at Amsoft Technologies as a Web Developer Intern was for about 2 and half month.

Amsoft Technologies is an IT Consulting and Software Company serving in IT related areas since its incorporation for more than 12 years. The Company was founded by a team of Experts and Engineers specializing in System Analysis, Software, Web Application Development, Web Services and IT Consulting Services. Amsoft Technologies design custom-built software applications for businesses of various size and industries. By analysing the operations and aims of business, Amsoft Technologies can produce custom coded software, tailored to your business needs, ensuring a successful, scalable and robust solution that can accrue maximum return on your investment.

I worked on PHP based framework (CodeIgniter 4), JavaScript and database. I learned many things about real-world projects, handling client, workflow, organization structure and communication methods.

## Some secretes about me

I have some secretes I keep to myself, one time when I was playing football with my friends in playground of school, I hit ball towards the office. Which brock the window glass. Luckily no one was at the office so, we ran away from there. Nobody spoke anything about that incident to anyone and principle did not find us.

Another secret is that I got angry and hit very hard in the whiteboard of my classroom and the board cracked a little. Everyone had already left the classroom so I to quietly went home. Next day in the classroom friends talked about the crack in board in which is said that it must have cracked because of the cold. As it was time of winter and cold can do that some time.
